

Analysis Services Pricing Schedule

2026 Pricing Schedule | Revised September 2026

Analytical testing for research, development, quality, and release-support workflows. Prices are per sample unless otherwise noted.

Service	Price / Sample
API Identity Verification / API Purity by UPLC-MS	\$170
API Identity Verification / API Purity / Net API Content by UPLC-MS	\$215
Endotoxin Analysis by Recombinant Factor C Fluorescence Assay (rFC)	\$125
Heavy Metals by ICP-MS (10-metal panel: Class 1, Class 2A, Class 3)	\$150
Bundle A - API Identity Verification / API Purity / Net API Content / rFC Endotoxin	\$315
Bundle B - API Identity Verification / API Purity / Net API Content / rFC Endotoxin / Heavy Metals Panel	\$425
Bundle C - API Identity Verification / API Purity / Net API Content / rFC Endotoxin / Full Sterility by Rapid Growth	\$515
Full Sterility Analysis by Rapid Growth-Based Method (BacT/ALERT or equivalent; 2-5 day typical growth cycle)	\$225
Full Panel A - API Identity Verification / API Purity / Net API Content / rFC Endotoxin / FDA/ICH Heavy Metals / Rapid Growth-Based Sterility	\$600
90-day stability (ambient and extreme conditions)	\$750
180-day stability (ambient and extreme conditions)	\$1,200
Osmolality	\$100

Bulk Discount Tiers

Order Volume	Discount Applied
10-19 samples	5% off base analysis pricing
20-50 samples	10% off base analysis pricing
More than 50 samples	15% off base analysis pricing

For ordering, turnaround times, payment, and service terms, see page 2.

Service Terms and Ordering

Turnaround Time and Rush Service

- Standard turnaround for UPLC-MS, rFC endotoxin, ICP-MS, and rapid growth-based sterility is 5-7 business days from sample acceptance unless otherwise stated.
- Stability services follow the selected 90-day or 180-day study period under ambient and extreme conditions. Reporting timing is confirmed with the study scope.
- Rush service for eligible analyses offers 24-hour turnaround at 2x base analysis cost. Rush service does not shorten stability study periods or required microbial growth cycles.
- Rush requests require prior approval and depend on sample quantity and current lab capacity. Call or email ahead to confirm availability.

Payment and CoA Delivery

Invoices are issued at sample acceptance. CoA delivery occurs upon invoice payment unless otherwise stated.

Order Submission and Questions

Service requests: orders@avanalytical.com

Analysis request portal login is provided during client onboarding.

General questions: info@avanalytical.com

Sample Preparation and Additional Services

Pricing is subject to sample suitability, method applicability, matrix complexity, and confirmed scope of work. ICP-MS digestion or complex matrix preparation (capsules, tablets, serums, etc.) may be billed at an additional **\$75-\$150 per sample**. Additional preparation, investigation, retesting, data packages, or special reporting may be quoted separately.

More complex services, including amino acid chain verification, counter-ion determination, select ELISA analysis, and other analyses, are available case by case. Contact us to discuss requirements and obtain a quotation.

Client Information and Report Access

Issued CoAs are searchable online for one year after issuance. Download or archive reports before that time if required. Longer retention can be accommodated upon request for a small fee.

A client onboarding packet, including invoicing and shipping instructions, is available upon request. Samples are accepted only after onboarding information is complete.

High-volume clients are welcome to inquire about special pricing agreements and payment terms.

Analytical Testing Disclaimer

AV Analytics provides analytical testing and reporting services only. Results are based solely on the submitted sample(s), requested scope of analysis, and methods performed. AV Analytics reports do not constitute or imply endorsement, approval, certification, validation, or guarantee of any product's safety, efficacy, quality, regulatory compliance, marketability, or fitness for use unless otherwise stated in writing. Product safety, labeling, claims, regulatory compliance, release decisions, and use of analytical results remain solely the responsibility of the client or product sponsor.
